

# INITIAL CONSTRUCTION SEGMENT

### Construction Package Elements

Construction Package 1-4 are civil and structural packages with common elements such as:

- Bridges
- Aerial structures
- Culverts
- Grade separations
- Trenches
- Tunnels
- At grade construction (level ground)
- Anti-intrusion barriers
- Security fences
- Drainage
- Utility relocations

Construction Package 5 runs the length of the Initial Construction Segment and will include track associated construction.

0 2.5 5 10 15 20 Miles

- Proposed HST Station (NIC)
- Existing Amtrak Stations
- HST Alignment
- +— UPRR Line
- +— BNSF Line

**Note:** This is an indicative or planned view of how construction could happen. The alignment will not be confirmed until the project has passed through the complete environmental process, the final alignment selected and mitigation measures identified. Construction packages 1 and 2 limits are fixed however packages 3 and 4 will be adjusted based on environmental findings and remaining budget.
