

SAFETY WITH UBER

Uber's technology makes it possible to focus on safety for riders and drivers before, during, and after every trip in ways that have never been possible before.

BEFORE GETTING IN THE CAR

No more street hails or waiting outside to find a ride. A rider can start the Uber app from anywhere and wait safely inside for the car to arrive.

No discrimination. No ride is too long or too short. All requests are blindly matched based on the closest available driver-partner, meaning that there is no discrimination based on race, gender, or pick-up or drop-off location. Day or night, people can safely get to their destination, even if it is hard to reach.

Trips are no longer anonymous. When a driver-partner accepts a request, a rider sees his or her first name, photo, vehicle model, and license plate number. Riders can also check whether others have had a good experience with him or her.

DURING THE RIDE

Never get lost. The location is clearly marked so riders know where they are on their journey -- and if they are on the right route.

Share your location. Riders can easily share their trip details -- including the specific route and estimated time of arrival -- with selected friends or family at the touch of a button.

No need for cash. Because payments can be made automatically and securely via the credit card, debit card, or PayPal account on file, riding with Uber significantly reduces the potential risk and conflict that can stem from disputed fares, lack of cash, or fare evasion. This is particularly good for drivers because carrying large quantities of cash can make them a target for crime.

AFTER ARRIVING AT THE DESTINATION

Feedback and ratings after every trip. Riders and driver-partners are required to rate each other and provide feedback for every trip before requesting or accepting another ride.

24/7 support. If riders or driver-partners have any questions about their trip, or if they need to report an incident, our customer support team is ready to respond to any issues.

Rapid response. We have a dedicated Incident Response Team to answer any urgent issues. If we receive a report that there has been an accident or incident, we can suspend the relevant parties and prevent them from accessing the platform until the matter is resolved.

BEHIND THE SCENES

Contact drivers without providing personal information. Uber uses technology that anonymizes riders' and driver-partners' phone numbers so that they do not have each other's real contact details.

Always on the map. Global Positioning System (GPS) data for all rides on the Uber platform are logged so we know which driver-partners and riders are riding together and where they are for the duration of their trip. GPS also enables us to verify the efficiency of every route being used, which creates accountability and a strong incentive for good behavior.

Working with law enforcement. In cases where law enforcement provides us with valid legal process, we collaborate with them on investigations, e.g. by providing trip logs.

New technologies, such as GPS mapping, improve safety and increase accountability

Riders can let family and friends know the first name of their driver and where they are in real time

Two-way ratings and feedback enable a constantly up-to-date quality assurance system

WHO'S BEHIND THE WHEEL?

Always up-to-date documentation. Driver-partners must provide their licensing and vehicle documentation before being able to drive on the Uber platform. Our system keeps track of every document's validity; if a document expires, Uber's system automatically prevents the driver from working on the platform until their documents are in order.

Zero tolerance policies. In the event of dangerous behaviour by a rider or driver-partner, Uber's response team can deactivate that person's account, immediately preventing him or her from accessing the platform again. This removes incentive for bad behavior and prevents it from being repeated on the platform.

Driver-Partner Pre-Screenings. Every Uber driver-partner undergoes a pre-screening process before he or she is allowed to access the platform. This includes both a criminal and driving history check, as well as minimum vehicle requirements. Below are the requirements for Uber's pre-screening process in the United States, with some variance to account for local requirements.

| | | P2P | LIVERY |
|--|--|---|---|
| AGE AND DOCUMENTATION | Age | If age 21 or 22, the applicant must have a driver's license for THREE or more years | Age 21 or older with 1 year of licensing |
| | | If 23 or older, the applicant must have a driver's license for ONE or more years | |
| | Documentation | Valid personal auto insurance that meets or exceeds state requirements | Valid commercial auto insurance |
| | | | Valid commercial registration |
| Valid licensing | | | |
| DRIVING HISTORY | Minor Violations | No more than THREE in past THREE years | No more than FIVE in past FIVE years |
| | | Non-fatal accidents, moving violations, speeding tickets, traffic light violations | |
| | Major violations | None of the following in the last THREE years | |
| | | Driving on a suspended, revoked or invalid license or insurance | |
| | | None of the following in the last SEVEN years | |
| | | DUI or drug-related driving offenses | |
| Speeding 100+ MPH, hit and run, reckless driving, street racing or speed contest | | | |
| CRIMINAL HISTORY | None of the following in last SEVEN years | | |
| | Any felony | | |
| | Any driving-related offenses | | |
| | Violent crimes | | |
| | Sexual offenses | | |
| | Child abuse or endangerment | | |
